DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-7, drawn to a toner having certain sizes and magnetic properties, classified in class 430, subclass 111.41.
- II. Claims 8-11, drawn to a toner having a specific combination of silica additives, classified in class 430, subclass 108.7.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the respective toners are not disclosed as being capable of use together noting the toners are specifically referred to as different aspects with different supporting disclosures (compare pp. 17-26 with pp. 26-46) and different examples of their function. The first aspect of the invention prevents fogging by control of the d/D ratio (p. 24) and the $\sigma r/\sigma s$ ratio. The second aspect of the invention is described in page 27 as including the two types of silica. "Silica A acts mainly to improve toner fluidity while toner B prevents adhesion between toner particles. Due to the combined effect of these two types of silica image fogging and image dropout are prevented, and image quality is improved." Clearly, the separate inventions have different modes of operation and different manners of functioning.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to the law firm of Oliff & Berridge on 7 June 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher RoDee whose telephone number is 571-272-1388. The examiner can normally be reached on most weekdays from 6:00 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
